

ARIN

DESIGN KING & MIRANDA

ARIN was born from the belief that the expert user is not interested in a hard and functional aesthetic and even less in a playful and falsely domestic look that does not comply with the rigid standards of the industry. In reality the expert user is, as always, waiting for someone or something to intercept his needs and expectations. To intercept and interpret these needs was a priority in the conception and design of ARIN.

ARIN

DESIGN KING & MIRANDA

TECHNICAL DESCRIPTION

Seat adjustable in depth and with back in polypropylene upholstered or without upholstery and optional adjustable lumbar support in pressure and height. Technical arms in polyamide, adjustable.

Base in polyamide or polished aluminium. "Synchro" mechanism, with tension regulation and gas elevation. Optional hard or soft castors (selfbraking) or glides.
